Snapshot Data Store » CDP Compliance for SDS

Customer Data Protection (CDP) module is now introduced in Snapshot Data Store and it provides the tools and functionality to assist a financial institution's compliancy to the General Data Protection Regulation (GDPR). This feature makes TDE compliant with CDP and provides Right of Erasure (right to be forgotten) for it.

Semantic Query Layer » Enrichment Changes in SQL Framework

The SQL framework now supports,

- Date enrichment rule feature to design and evaluate the rules for APIs.
- Nested Condition in Condition Rule with multiple condition options.
- Field order input for response fields to identify in which order the schema should be constructed.
- Datatype for extension field for evaluating the rule in expected format if multiple rules are available in one extension field.
- Absolute operation in Calculation Rule to obtain absolute values.
